

## HOW TO MAKE A BID

Bidding in Subastotodo.com is very easy:

- **Register**
- **Find** the article lot you are interested in by means of the category menus of the Auction.
- Press the Details button to obtain all the available information about the article
- Press the link "**Bid**" (if you are not registered at this moment the system will ask for your identification to proceed).
- Exceed with your bid the quantity that is indicated for each article
- Subastotodo.com will notify you, by e-mail, about the status of your bidding.
- Automatic bidding

In Subastotodo.com we use a very practical system of bidding, called maximum bid or automatic bidding, which makes bidding for an article easier and less work for the buyers. **Maximum Bid works like this:**

- When you bid, (Maximum Bid) you indicate the maximum price you are willing to pay for the article. This amount is kept hidden from the other buyers.
- The Subastotodo.com system compares your bid with that of the other bidders.
- The system makes bids in your name, using only the necessary quantity to maintain you as maximum bidder. The system will bid for you until it reaches the maximum amount that you have indicated.
- If another bidder presents a maximum amount higher than yours, it means he has outbid you. But if there is no other bidder that offers a maximum amount above yours, you win the article. This way you can pay a quantity considerably lower than your maximum price.

This means that you do not have to make a new bid each time another bidder presents his bid.

- At the end of the auction we will notify you if the lot has been awarded to you for being the maximum bidder and to let you know of the final amount (commissions, taxes and shipment fees), payment and shipping terms.
- Bids can be made online during the period that the auction lasts.
